# Sonim Conflict Minerals Policy

## **Sonim commitment on Conflict Minerals Legislation**

Sonim is committed to taking all steps to comply with the legislation and is implementing a comprehensive due-diligence process to meet our obligations. Further, Sonim is committed to sourcing components and materials from companies that share our values around human rights, ethics and environmental responsibility.

## **Sonim's Supply Chain Expectation**

In light of broad public concern over the so called conflict minerals issue, suppliers who manufacture components, parts, or products containing tin, tantalum, tungsten, and/or gold must be particularly vigilant to follow commitment of sourcing those materials from environmentally and socially responsible sources only. Materials, which either directly or indirectly contributes to conflict, are unacceptable. Suppliers shall define, implement and communicate to sub-suppliers their own Conflict Mineral Policy, outlining their commitment to responsible sourcing and legal compliance and measures for implementation.
